- When returning to port, crew must present to the Port Otago Security Office and wait for an escort back to the vessel

Harbour Control/Port Protection Team contact details:
03 472 9882 or VHF Ch. 14

BIOSECURITY REQUIREMENTS

The operator or person in charge of any vessel must take all reasonable and practicable steps to ensure that when the vessel enters New Zealand territory, it is free of regulated pests and substantially free of biosecurity contamination.

All requirements are available in the Craft Risk Management Standard for Vessels – this can be found at <https://www.mpi.govt.nz/dmsdocument/19757-Craft-Risk-Management-Standard-for-Vessels>

While a vessel is within New Zealand territory, the operator or person in charge of the vessel must ensure that:

- a) no risk goods (including food and garbage) are discharged overboard or otherwise leave the vessel other than for disposal by an approved system or for biosecurity clearance at a place of first arrival
- b) all biosecurity contamination and other risk goods are secured on the vessel
- c) no removal of biofouling from an international vessel is undertaken in New Zealand territory other than through use of an MPI-approved haul-out facility or MPI approved treatment.
