Notes to the Condensed Financial Statements

For the six months ended 31 December 2014 (Unaudited)

1. General information

The unaudited interim condensed financial statements presented are those of Port Otago Limited ("the Company"), its subsidiaries, associates and share of joint ventures ("the Group"). The Company is a limited liability company incorporated in New Zealand and registered under the Companies Act 1993.

2. Summary of significant accounting policies

Basis of preparation

These unaudited condensed interim financial statements have been prepared in accordance with NZ IAS 34 Interim Financial Reporting. The unaudited interim financial statements have been prepared using the New Zealand Dollar as the functional and presentation currency.

The unaudited condensed interim financial statements should be read in conjunction with the consolidated financial statements and related notes in the Company's Annual Report for the year ended 30 June 2014.

Accounting policies

The accounting policies applied are consistent with those of the annual financial statements for the year ended 30 June 2014, as described in those annual financial statements

To ensure consistency with the current period, comparative figures have been restated where appropriate.

3. Investment property valuation

Investment properties are carried at valuations undertaken by independent registered valuers as at 30 June 2014. The Board has received and considered advice from management that there has been no material change to those valuations. Borrowing costs and other costs recognised in the accounting period that are directly attributable to the acquisition of long term investment property development projects are capitalised as part of the cost of those assets.

4. Derivative financial instruments

The Group uses derivative financial instruments (interest rate swaps) to economically hedge its exposure to interest rate risks arising from operational, financing and investment activities.

Notes to the Condensed Financial Statements (Continued)

Notes to the Condensed Financial Statements (Continued)

For the six months ended 31 December 2014 (Unaudited)

6. Commitments

At 31 December 2014 the Group had commitments/approvals for capital expenditure of \$1.0 million (31 December 2013: \$10.8 million, 30 June 2014: \$4.42 million) which relates to purchases and upgrades of port's assets.

7. Contingencies

Apart from the matter noted below, there are no other material contingent liabilities at 31 December 2014 other than those arising in the normal course of business.

Tax deductibility of acoustic treatment expenditure

Port Otago incurs expenditure to acoustically treat residential properties in Port Chalmers to comply with obligations under the Port Noise Mitigation Plan. The Inland Revenue Department maintains that the expenditure is capital in nature which is contrary to the position of Port Otago and supported by professional advice. An estimated additional income tax of \$250,000 excluding interest and penalties, if any, would be payable should the expenditure not be deductible. A formal dispute resolution process is continuing.

8. Events after balance date

Dividends

On 11 February 2015 the directors declared an interim dividend of \$3.25 million.

Conventional cargo volume (000 tonnes)	727	673

Chairman's Half Year Review

Financial results

Number of vessel arrivals

The Port Otago Group's unaudited tax-paid result of \$22.0 million for the six months ended 31 December 2014 compares to \$5.7 million in the comparative six month period last year. This result includes an underlying port operations and investment property profit after-tax of \$8.2 million, which is an increase of 27% from the last comparative period.

235

233

The after-tax contribution from the sale of the Lyttelton Port Company Limited (LPC) shares was \$13.8 million which included a gain on the sale and final dividend less holding and disposal costs.

Interim dividend

An interim dividend of \$3.25 million, an increase from the \$2.5 million paid last year, will be paid on 12 February 2015 to our shareholder, the Otago Regional Council.

Financial position

The Group equity ratio has increased to 80% following the LPC share sale and provides Port Otago with the platform for continued investment in the port to future-proof port operations. \$57 million of borrowings have been repaid which reduces Group borrowings to \$63 million from \$120 million at 30 June 2014.

Port operations - trade

Export and import volumes of 74,000 TEU (twenty foot equivalent units) were in line with the comparative period. Tranship volumes were down 2,900 TEU as the comparative period included one full vessel exchange. This occurs where the entire container volume from one vessel is off-loaded and re-loaded on to another vessel when a vessel is changing its trade lane. Including tranships, the total container throughput of 77,400 TEU was 4% lower than the 80,400 TEU throughput recorded in the previous corresponding period.

There were 235 vessel calls for the six months compared to 233 for the previous corresponding period. Cruise ship visits increased to 30 vessels from 25 in the comparative period.

Conventional cargo tonnes increased 8% to 727,000 tonnes. Log exports were up 6% to 422,000 tonnes with cement and fertiliser imports also increasing.

Port operations - financial

Earnings before interest, tax, depreciation and amortisation (EBITDA) for port operations were \$8.7 million, a decrease of 1% on the comparative period. Revenue from warehouse storage activities and conventional cargo tonnes offset lower container revenue resulting in port operations revenue increasing by 1%.

Port operations – capital expenditure and port development

Following the successful integration of our new tug, the Taiaroa, into the Port's towage operation, the two older tugs, Rangi and Karetai, were sold and generated a \$0.4 million gain on disposal. The sale price achieved is a tribute to the quality of the original build by the Otago Harbour Board and the maintenance of these vessels during their 40 years' service on the Otago harbour.

Preparations to commence deepening the channel to Port Chalmers are continuing. Various scenarios are being considered which will deliver a 14 metre channel in a timeframe our customers require. There are a range of associated projects, including berth deepening and extension of the multi-purpose wharf, which will be progressed in conjunction with channel deepening.

Health and safety

There was one Lost Time Injury (LTI) during this six month period. Our LTI frequency rate has reduced to 6.6 per million hours worked, compared to 11 per million hours worked at 30 June 2014. The Medically Treated Injury (MTI) frequency rate increased to 23.2 per million hours worked from 21.8 per million hours worked at 30 June 2014. This combined to reduce the Total Injury Frequency Rate to 30 per million hours worked.

A further initiative was the introduction of the electronic health and safety portal during the period. This portal, located on the company intranet, provides access to a central repository for all health and safety documentation and is available to all staff.

Staff

A 3-year Collective Employment Agreement has been agreed for the period through to 2017. There will be fresh challenges in the coming year but we are confident that the dedication and determination of staff will remain pivotal to the success of Port Otago.

Chalmers Properties Limited (CPL)

The operating profit before property disposals and tax, for the CPL investment property portfolio increased to \$5.4 million, up 8% from the previous corresponding period.

During this period, we negotiated and settled a partition agreement with one of our joint venture partners which resulted in the Group purchasing their share of industrial zoned land on the eastern side of the Te Rapa by-pass in Hamilton. As part of the partition agreement, our joint venture partner acquired our share in the employment and commercially zoned land on the western side of the Te Rapa by-pass which resulted in a gain of \$0.8 million for the Group. This agreement allows the Group to actively manage the industrial land development to meet market demand and further simplifies our investment in the Hamilton area.

The sale of an Auckland investment property at Dalgety Drive settled during the six month period for \$12.4 million. The proceeds of the sale will be reinvested into an appropriate property which meets the Group's investment strategy.

Construction of the \$2.7 million office and warehouse for CHEP New Zealand, in the Dunedin industrial precinct, was also completed.

Directors

In January 2015, Vincent Pooch resigned as a Director following a 12 year involvement with the Company and its subsidiaries. On behalf of the Board I would like to thank Vincent for his contribution to the Group.

Outlook

The sale of the LPC shares and the continued good performance of the diverse Port Otago Group sees us well-positioned to make further investments in port infrastructure in line with customer requirements.

The full year contribution from CPL will be down on last year following the sale of the Dalgety Drive, Auckland, investment property which will affect investment property rentals. CPL is maintaining the strategy of improving the quality and returns from its property portfolio as opportunities arise.

On behalf of the Board of Directors

David Faulkner Chairman 11 February 2015
